Sub: Workshop on "CNG for Automotive Fuel"

Dear Sir,

It was indeed pleasure to attend one day workshop on "CNG for Automotive Fuel" on 24th July at Hotel Pride, Nagpur and we thank you for organizing a workshop on this important subject.

Various authors covered different aspects of safety measures required in the CNG sector. The proceedings were very interesting and enlightening for all the persons attending the seminar. Most interesting part was details of some actual accidents in the past and the analysis regarding causes and remedial measures for the same, given by Mr. D. K. Gupta and others. The Panel discussions were very lively with interactions from all sections as well as expert comments by the chairpersons.

The workshop has been grand success in terms of creating general awareness regarding safety concerned with CNG operations among all related industry sections and the arrangements were also excellent. We complement PESO on successfully organizing the workshop.

Thanking you

Yours truly

S. S. Mande  
Director
